PSIwms for Automotive Logistics

PSIwms

The warehouse management system for optimising your intralogistics

In the automotive environment, the optimal storage of raw materials, semi-finished, finished and spare parts plays a major role. This implies an intelligently connected intralogistics and flexibly adaptable warehouse processes. PSIwms supports the handling of all these requirements and offers a genuine added value in practice. PSIwms plans, controls and optimizes business processes in intralogistics.

We provide the comforting project security that your logistics deserves: we have decades of experience and have already successfully implemented several hundreds of warehouse projects.

PSIwms provides the following features

- + Modular design allows easy and flexible adjustment
- + Support of all warehouse forms, types and technologies
- + Release-ready, regardless of the degree of customization
- + PSI Click-Design – freely customizable and scalable interface
- + Process-oriented warehouse visualization

PSIwms supports, e.g., the following industry-specific processes

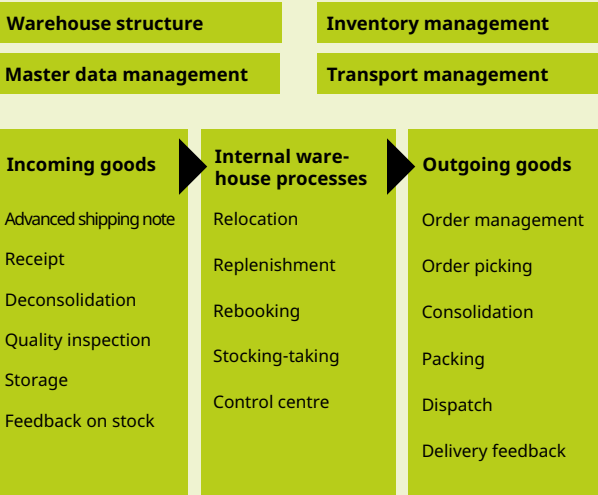

- + eKanban
- + Order picking strategies (e.g. multi-order picking, two-level, serial, ...)
- + Event management
- + Forklift guidance system (incl. route trains, timetables, ...)
- + Kitting „Set-building“
- + Dock, slot & yard management
- + Just in time/just in sequence
- + Slot management
- + Quality control
- + Production supply/disposal

PSIwms architecture

Of course, our PSIwms solution complies with the VDI 3601 guideline regarding the tasks and performance areas of an IT system for warehouse management. An overview of all PSIwms functions can be found here:

Core functions according to VDI 3601

Additional functions according to VDI 3601

Batches	Best before dates
Cross-docking	Package optimisation
Dock & yard management	Production supply and removal
Double-deep/multi-deep storage	Resource planning
Hazardous goods	Returns
Hazardous substances	Serial numbers
Weight control	Warehouse reorganisation
Handling units management	Forklift guidance system
Kit building	Value-added services
Consignment	Vendor managed inventory
Empties and load carriers	Scrapping
(Multiple) client capability	Customs
Multi-warehouse handling capability	

Interfaces to

ERP systems	Pick-By-Voice	MFR / MFS
Shipping systems	Pick-By-Light	Pick-By-Vision
Localisation	Web service/ restful	
Driverless transport systems		

PSIwms additional functions

Activity tracking	Image capture
Adaptive order start	Modelling
Adaptive scenario management	Packing units
Archive	Picking batch
Automated testing	PSI-Click-Design
Stock separator plus	Stocklist management
Billing	Time slot control / Slot management
Dashboard	Visualisation of incoming goods (OSM)
Digital twin	Warehouse service broker
Event management	Warehouse visualisation
Excise Tax	

Your benefits

- + Best practice approach ensures project realization and execution in time & on budget
- + Standard interfaces enable fast and safe commissioning
- + Fast and secure data exchange with HOST system through integrated automatic test
- + Flexibility and adaptability for your individual needs and processes
- + Investment security through pioneering JAVA technology and permanent further development (annual release)
- + Powerful and stable even with high system loads
- + 24/7 support, individual service level agreement, own data center
- + More efficient processes through self-configuring system, depending on events (e.g. volume, dates, ...)

” Efficient process control, the option of an internal configuration and a short project duration were key decision criteria for us. “

Lars Brand

CEO, Sostmeier Transport & Logistics

Renowned customers rely on PSiwms (excerpt)

Innovative and future-proof.

The continual sharing of ideas with our customers is fundamental to the development of PSIWms. One specific way we do this is with the annual PSIWms User Day, when we offer the community a platform for discussion, and the opportunity to collaborate and create ideas.

mobile

smart

integrative

Each year, PSIWms invests over 10% of its turnover into research and development for innovation and product refinement.

Technical features

- + Direct connection to SAP (and other ERP systems) as well as shipping systems and driverless transport systems
- + Cloud-enabled and available from PSI data center
- + The hybrid, parallel use of different radio data transmission technologies
- + A future-proof, expertise-based framework
- + Automatic system testing for processes and functions
- + Certified data security (ISO 27001)
