

+ PSI Logistics Suite

PSIwms for Spare Parts Logistics

PSIwms

The warehouse management system for optimising your intralogistics

To ensure a trouble-free production and operation in every phase, a constant availability of spare parts must be guaranteed. A well-thought-out and tailor-made planning of all necessary processes such as needs assessment, responsiveness, short-term provision and delivery of spare parts at the destination are prerequisites to avoid downtime, additional delays and costs.

The use of the PSI Logistics Suite creates a balance between sufficient warehousing and the lowest possible capital commitment. This way, downtime and failure of production processes and resulting additional costs can be avoided. We provide the comforting project security that your logistics deserves: we have decades of experience and have already successfully implemented several hundreds of warehouse projects.

PSIwms provides the following features

- + Modular design allows easy and flexible adjustment
- + Support of all warehouse forms, types and technologies
- + Release-ready, regardless of the degree of customization
- + PSI Click-Design – freely customizable and scalable interface
- + Process-oriented warehouse visualization

PSIwms supports, e.g., the following industry-specific processes

- + Adaptive job start
- + Two-step picking
- + Batch building
- + Multi-order picking
- + Prioritization of orders
- + Strategies for order picking optimization
- + Batch/serial number
- + Kitting „Set-building“
- + Multi-level supply
- + Forklift guidance system (incl. route trains, timetables, ...)
- + Event management
- + Dock, slot & yard management

PSIwms architecture

Of course, our PSIwms solution complies with the VDI 3601 guideline regarding the tasks and performance areas of an IT system for warehouse management. An overview of all PSIwms functions can be found here:

Core functions according to VDI 3601

Additional functions according to VDI 3601

Batches	Best before dates
Cross-docking	Package optimisation
Dock & yard management	Production supply and removal
Double-deep/multi-deep storage	Resource planning
Hazardous goods	Returns
Hazardous substances	Serial numbers
Weight control	Warehouse reorganisation
Handling units management	Forklift guidance system
Kit building	Value-added services
Consignment	Vendor managed inventory
Empties and load carriers	Scrapping
(Multiple) client capability	Customs
Multi-warehouse handling capability	

Interfaces to

ERP systems	Pick-By-Voice	MFR / MFS
Shipping systems	Pick-By-Light	Pick-By-Vision
Localisation	Web service/ restful	
Driverless transport systems		

PSIwms additional functions

Activity tracking	Image capture
Adaptive order start	Modelling
Adaptive scenario management	Packing units
Archive	Picking batch
Automated testing	PSI-Click-Design
Stock separator plus	Stocklist management
Billing	Time slot control / Slot management
Dashboard	Visualisation of incoming goods (OSM)
Digital twin	Warehouse service broker
Event management	Warehouse visualisation
Excise Tax	

Your benefits

- + Best practice approach ensures project realization and execution in time & on budget
- + Standard interfaces enable fast and safe commissioning
- + Fast and secure data exchange with HOST system through integrated automatic test
- + Flexibility and adaptability for your individual needs and processes
- + Investment security through pioneering JAVA technology and permanent further development (annual release)
- + Powerful and stable even with high system loads
- + 24/7 support, individual service level agreement, own data center
- + More efficient processes through self-configuring system, depending on events (e.g. volume, dates, ...)

” PSiwms ensures efficient and highly secure logistics and order picking processes enabling us to meet current and future market challenges. “

Torsten Hettich

Warehouse Manager, HECO-Schrauben GmbH & Co. KG

Renowned customers rely on PSiwms (excerpt)

Innovative and future-proof.

The continual sharing of ideas with our customers is fundamental to the development of PSIWms. One specific way we do this is with the annual PSIWms User Day, when we offer the community a platform for discussion, and the opportunity to collaborate and create ideas.

mobile

smart

integrative

Each year, PSIWms invests over 10% of its turnover into research and development for innovation and product refinement.

Technical features

- + Direct connection to SAP (and other ERP systems) as well as shipping systems and driverless transport systems
- + Cloud-enabled and available from PSI data center
- + The hybrid, parallel use of different radio data transmission technologies
- + A future-proof, expertise-based framework
- + Automatic system testing for processes and functions
- + Certified data security (ISO 27001)
