

PSIglobal

Supply Chain Network Design

PSI 

What can you achieve with PSIGlobal?

The software supports you in establishing and maintaining an efficient, service-optimized, resilient and sustainable supply chain.

Focus:

- ✓ Reduce logistics costs by up to 10% and more
- ✓ Increase service orientation in the distribution network with reduced throughput times and an improved customer service level
- ✓ Increase transparency in SCM thanks to transparent map display, dashboards and KPIs
- ✓ Calculate and optimize carbon footprint
- ✓ Minimize supply chain risks by considering unforeseen incidents
- ✓ Optimize freight purchasing

Achievement of objectives

How does PSIGlobal help to achieve the objectives?

- + Digital Twin as the basis of your supply chain to identify possible influences and scenarios
- + The calculations in PSIGlobal can be used to determine existing cost and service potentials to achieve an optimal weighting of target interests in your supply chain
- + The software provides information about potential supply chain risks so that you can initiate appropriate measures to increase supply chain resilience at an early stage

The sustainability calculations, analyses and optimizations integrated in PSIGlobal support you in establishing a sustainable and future-proof supply chain management.

Companies

Why is PSIGlobal the right choice for you?

- + The Software is not only linear but more complex/realistic tariff structures can be modeled
- + Single- and multi-level networks can be easily mapped
- + You have the option of modeling down to the item and order level
- + Simple and extensive possibilities for data preparation with a wide range of functions for answering strategic questions in the design and optimization of logistics chains

The use of PSIGlobal is an indispensable tool for the analysis, planning and optimization of supply chains for your company.

PSIglobal range of services.

Start with a concrete project and learn the individual functions of our supply chain system step-by-step.

Data management

Location optimization

Strategic route planning & carbon footprint

Logistics network routing

Sourcing strategies

Service provider comparison

Which areas is PSIglobal suitable for?

- + Industry & Production**
- + E-Commerce & Retail**
- + Consultants**
- + Logistics service provider**
- + Consumer Goods**

Data and facts:

+

- + 70+ users worldwide
- + 30+ installations worldwide
- + 154+ countries in which PSIglobal is used
- + 10% of sales are invested annually in research and development for a new release

+

- + Direct connection to SAP and other ERP systems through certified interfaces
- + Customer data approaches in any format (e.g. MS-Excel, MS-Access, Text, CSV)
- + Future-proof, Java technology-based framework; highest processing speed
- + Certified data security (ISO27001)
