

Sostmeier Automotive GmbH

- + **Industry:** Automotive
- + **Software:** PSiwms
- + **Implemented interfaces:** Johnson Controls host system via Lobster
- + **Country:** Germany (Pohlheim)

Implementation/handling (extract):

- + As the first step, operations commenced at the Sostmeier site in Pohlheim near Giessen
- + Using an agile project methodology based on the Best Practice approach and the extensive range of functions, the first phase of the project was implemented within 4 days
- + Efficient process management, the option to configure the system internally and a short project duration were the main deciding factors in favour of PSiwms
